May 13 ,2023

Dear Sir/Madam

Application for Associate Software Engineer Position,

I am currently completed final year of my Software Engineering bachelor's degree program at Informatics Institute of Technology which is affiliated with the University of Westminster. I hope all the knowledge that I have gained over the past four years will be useful for my future. I studied for three years, and I have worked in the industry as an intern full stack developer for a whole year. As a student who has completed the two three of the degree program successfully and have work experience in the industry for one year, I can bring a good potential to your company as an associate software engineer. I am a talented team player with excellent interpersonal skills such as leadership, problem solving, time management and communication. I hope that I will be a good fit for your company culture and be able to contribute more effectively. Now, I am keen to serve for an attractive and reputable company like yours, where I can get a great platform for my career development. Therefore, I am open for the opportunity for a possible interview to discuss in more detail about the value and potential I can bring to your already successful company. Please contact me at **+94775126426** or via email **lasarunilhan18@gmail.com** for further proceedings. Thank you for your time and consideration, I am looking forward to hear from you.

Sincerely,
Lasaru Udawatta.

LASARU NILHAN UDAWATTA

SOFTWARE ENGINEERING UNDERGRADUATE
